SPECIFICATIONS

Pan	Mass	Volume
	25,00kg	0,070m ³

INSTALLATION

1. Prepare water inlet and outlet heights and ensure plumbing is in correct position.
2. Attach brackets to the floor. Place pan into position to ensure that brackets are in correct position. Remove pan and apply thin layer of silicone sealant to floor surface. Place pan back into position and fix screw to the bracket.
3. Flush the water line.
4. Fit double flap seat
5. Complete all plumbing connections and test flush.
6. Always use silicone sealant or equivalent between the pan and the finished floor and wall surfaces for a secure and neat installation.

NOTE: The warranty will not apply to any product installed with cement.
